

Skyland USA Welcomes Southern California Licensed rooflite® Green Roof Media Blender

FOR IMMEDIATE RELEASE

BAKERSFIELD, CA – August 31st, 2009 - Skyland USA, LLC is proud to introduce the newest licensed blender of rooflite® certified green roof media products. Delmos Forest & Cinder Products, doing business as Pacific Coast Forest Products of Arvin, California, south of Bakersfield, will blend rooflite® green roof media to comply with all current and future ASTM and FLL¹ standards.

Through meticulous sourcing of regional raw materials and careful laboratory development and analysis, rooflite® certified green roof media products are now available across Southern California. Pacific Coast employs a fleet of vehicles, including end-dumps, walking floors, and flatbeds, which can supply bulk and bagged rooflite® green roof media products from the Central Coast to San Diego. The first project using rooflite® in the Southern California, NASA's JPL Flight Center in Pasadena, was completed this spring and received LEED Gold Certification from the US Green Building Council.

Pacific Coast produces and delivers the highest quality forest and soil products available. Their unique and specialized variety of forest products have become an essential part of every landscape project; creating rich and distinctive gardens and landscaping throughout California. Pacific Coast is committed to extraordinary service and consistency of quality products. Their materials are top-notch, and the most consistent and uniform in the industry.

Skyland USA is the creator of rooflite® green roof media products. We engineer the only independently branded green roof media products available on a nationwide basis, which resolves the issues of procuring a proven and tested green roof media for all of your green roof projects regardless of their size, location, or plant selection. With 9 licensed blenders producing rooflite at locations in 12 states, we are committed to being number one supplier of green roof media in the nation.

Skyland USA has been producing green roof media products for the North American market for over five years. We have over thirty years of combined international experience in all aspects of the green roof industry including landscape architecture, environmental engineering, product and system design, green roof design, installation, and maintenance. With this extraordinary expertise, we continue to develop our complete line of media products specifically for the green roof industry. Grow on us - Visit www.skylandusa.us today for more information.
