

rooflite® Certified Green Roof Growth Media Available Across America

FOR IMMEDIATE RELEASE

CLEVELAND, OH – April 13th, 2007 Skyland USA, LLC is proud to announce that its rooflite green roof growing media is quickly approaching coverage to include the entire United States. Previously rooflite had supplies east of the Mississippi River. Due to the increasing demand of rooflite and the growing popularity of green roofs and a sustainable environment, five additional blenders were added in the past four months.

Skyland's newest rooflite blenders are: New Milford Farms/Garick (New Milford, CT); Tarheel Bark/Garick (Harrisburg, NC); Read Custom Soils (Canton, MA); Compost Supply, INC (Glen Ellyn, IL); and Swanson Bark & Wood Products (Longview, WA). Additional blenders are Laurel Valley Soils (Avondale, PA); Paygro/Garick (South Charleston, OH); and Smith Garden Products/Garick (Cumming, GA). For more information on these blenders, please contact rooflite at 877-268-0017 or visit our website at www.SkylandUSA.us

rooflite® is a standardized green roof growing media available for use on all green roof systems throughout North America. rooflite® meets American Society for Testing Materials (ASTM) standards, plus the German FLL¹ Green Roof requirements. Precisely designed and manufactured to meet these stringent standards, rooflite provides assurance that your green roof vegetation has the ultimate balance of nutrients, water holding capacity, and drainage characteristics to create and promote a sustainable green roof environment. Depending on what type of green roof system is desired, rooflite is produced in three different forms: rooflite extensive, rooflite intensive, and rooflite semi-intensive.

rooflite® is a joint effort of the companies Skyland and Garick. The partnership of the two melds the production and technical know-how that Skyland brings to the table with the logistics and customer service strengths of Garick.

Skyland USA is the creator of rooflite® green roof media products. We engineer the only independently branded green roof media products available on a nationwide basis, which resolves the issues of procuring a proven and tested green roof media for all of your green roof projects regardless of their size, location, or plant selection. With 9 licensed blenders producing rooflite at locations in 12 states, we are committed to being number one supplier of green roof media in the nation.

Skyland USA has been producing green roof media products for the North American market for over five years. We have over thirty years of combined international experience in all aspects of the green roof industry including landscape architecture, environmental engineering, product and system design, green roof design, installation, and maintenance. With this extraordinary expertise, we continue to develop our complete line of media products specifically for the green roof industry. Grow on us - Visit www.SkylandUSA.us today for more information.
